PROFESSIONAL SUMMARY

Full Stack Developer in transition with 2.5+ years of experience as a Senior Selling Partner Support Associate at Amazon, where I worked in a structured, high-performance environment handling complex cases, policy-based evaluations, and cross-functional collaboration. In 2024, I made a deliberate career shift into software development and began an intensive Full Stack Development program to build strong technical foundations in modern web technologies. Since then, I have been actively developing personal and team-based projects using HTML, CSS, JavaScript, React, and Node.js, focusing on responsive design, clean architecture, and scalable solutions. Backed by 8+ years of international professional experience, including hospitality and supervisory roles in the United States, I bring strong analytical thinking, problem-solving skills, adaptability, and a disciplined work ethic. I am now focused on growing as a developer and contributing to impactful, user-centered digital products.
